

Riviere Square Hole Tree Grille - 1200 x 1200mm

BX 434-3

Cast iron square tree grille.

A range of vertical tree guards are available, these can either be attached using spiked legged fitting or the actual frame can have specially fabricated lugs to allow them to be bolted together.

Broxap can produce this type of grille with an Irrigation hole (both with or without a lid), see the custom options set out below.

The price includes the mild steel frame and security clamps. The standard coating is black, but other colours are available,

Dimensions:

- Outside measurement: 1200mm x 1200mm square
- Internal aperture diameter: 500mm
- Weight: 144kg

Fixing:

- Frames are available as medium or heavy duty, the difference being the amount of central support provided.
- The tree frame is secured into a concrete base by either bolting or sinking the tangs into wet concrete.
- The concrete base sections should be approximately 150mm wide and 200mm deep to provide adequate support.
- The tree grille is secured to the frame using anti-theft clamps
